Zbasic Language Reference Manual Table of Contents

Chapter 1 - Introduction..... 1
1.1 The ZBasic System Library ..... 3
1.2 The ZX Microcontroller Family..... 3
1.3 Conventions..... 4

Chapter 2 - ZBasic Language Elements..... 7
2.1 Identifiers..... 7
2.2 Data Types..... 7
2.3 Modules ..... 8
2.3.1 The Options Section..... 8
Option <pin> ..... 8
Option <port>..... 9
Option Base .....10
Option Explicit.....10
Option Language .....11
Option AllocStr .....11
Option StringSize.....11
Option Strict .....12
Option TargetDevice .....12
Option TargetCPU .....12
Option PortPinEncoding .....13
Option CodeLimit .....13
Option SignOn.....13
Option TaskStackMargin .....13
Option ExtRamConfig .....14
Option RamSize.....14
Option HeapSize.....14
Option HeapReserve.....15
Option HeapLimit .....15
Option MainTaskStackSize .....15
Option TxQueueSize.....15
Option RxQueueSize .....15
Option Com1Speed.....15
Option Include .....16
Option Objects.....16
Option Overload.....16
Option Library.....16

2.3.2 The Definitions Section.....17
Defining Constants .....17
Defining Variables.....18
Defining Arrays of Variables .....18
Defining Subroutines.....19
Defining Functions.....21

2.4 Expressions .....23
2.4.1 Operator Precedence.....24
2.4.2 Operator Associativity .....25
2.4.3 Arithmetic Operators .....25
2.4.4 Logical Operators .....25
2.4.5 Comparison Operators.....26
2.4.6 Miscellaneous Operators.....26
2.4.7 No “Short Circuit” Evaluation .....26

2.5 Statements.....27
2.5.1 Assignment Statement.....27
2.5.2 Call Statement.....27
2.5.3 CallTask Statement .....28
2.5.4 Console.Write and Console.WriteLine Statements.....28
2.5.5 Debug.Print Statement.....29
2.5.6 Do-Loop Statement and Variants.....30
2.5.7 Exit Statement .....31
2.5.8 For-Next Statement .....31
2.5.9 Goto Statement .....33
2.5.10 If-Then-Else Statement.....33
2.5.11 Select-Case Statement.....35
2.5.12 Set Statement .....36
2.5.13 While-Wend Statement.....37
2.5.14 With Statement .....37

2.6 Literals .....38
2.6.1 Boolean Literals .....38
2.6.2 Numeric Literals - Integral Values.....38
2.6.3 Numeric Literals - Real Values .....38
2.6.4 String Literals.....39
2.6.5 Built-in Binary Constants .....39
2.7 Comments.....39
2.8 Line Continuation and Multiple Statements Per Line.....39
2.9 Persistent Variables.....40
2.10 Program Memory Data Items.....42
2.11 String Types .....45
2.11.1 Bounded Strings .....46
2.11.2 Fixed-Length Strings.....46
2.12 Variable Initialization .....46
2.13 Type Conversions.....47
2.14 Parameter Passing Conventions.....47
2.15
2.15 Program and Data Item Properties.....48
2.16

Chapter 3 - Advanced Topics.....51
3.1 Scope and Lifetime.....51
3.2 Enumerations.....54
3.3 Serial Channels.....56
3.4 Queues.....56
3.4.1 System Queues.....58
3.5 Multitasking.....58
3.5.1 Advanced Multi-tasking Options.....60
3.6 Semaphores.....61
3.7 Timers.....62
3.8 Built-in Variables.....62
3.8.1 CPU Registers.....63
3.8.2 Control Program Variables.....67
3.9 Built-in Constants.....71
3.10 Conditional Compilation Directives.....72
3.11 Error Directive.....75
3.12 Notice Directive.....75
3.13 Include Directive.....75
3.14 Using Conditional Directives in Project and Argument Files.....76
3.15 Preprocessor Symbols.....76
3.16 Array Data Order.....77
3.17 Recursion in Subroutines and Functions.....77
3.18 Using Default Parameter Values in Subroutines and Functions.....78
3.19 Subroutine and Function Overloads.....78
3.20 Aliases.....79
3.21 Based Variables.....80
3.22 Based Procedures.....82
3.23 Reference Variables.....83
3.24 Sub-byte Types.....84
3.24.1 Forcing Byte Alignment.....84
3.25 Structures.....85
3.25.1 Structures in Persistent Memory and Program Memory.....88
3.26 Data Type Implementation Information.....88
3.26.1 User-defined Type Details.....89
3.26.2 String Data Type Details.....89
3.26.3 String Address and String Type.....90
3.27 Controlling the Heap Size and Main() Task Stack Size.....90
3.28 Task Management.....91
3.28.1 Task Control Block.....92
3.29 Dynamic Memory Allocation.....92
3.30 Exception Handling.....93
3.31 Run Time Stack Checking.....95

Chapter 4 – ZBasic Object-Oriented Extensions .....97
4.1 Enabling Object-Oriented Extensions.....97
4.2 Defining a Class .....97
4.3 Defining Class Methods.....99
4.4 Object Creation Issues.....100
4.5 Object Destruction Issues.....102
4.6 Object Assignment Issues.....102
4.7 Object Self-reference and Parent Reference .....103
4.8 Explicit Class References and Default Namespace References .....103
4.9 Class Sections.....103
4.10 Static Class Members .....104
4.11 Inheritance .....105
4.12 Abstract Classes, Abstract Methods.....108
4.13 Final Classes.....109
4.14 Using Mixins .....109
4.15 Using the Const Attribute for Methods .....110
4.16 Based Objects, Reference Objects.....111
4.17 Miscellaneous Class Elements.....112
4.18

Chapter 5 – Special Considerations for Native Mode Devices.....113
5.1 Using Inline C and Assembly Code .....113
5.2 Defining and Using External Subroutines, Functions and Variables.....114
5.3 Defining Interrupt Service Routines .....116
5.4 Executing Blocks of Code Atomically .....118
5.5 Attributes for Procedures and Variables .....119
5.6 Considerations for Task Stack Size.....120
5.7 Creating and Using Object Libraries.....120
5.8

Chapter 6 - Compatibility Issues.....122
6.1 Known Differences and Compatibility Between ZBasic and BasicX .....122
6.2 Known Differences and Compatibility Between ZBasic and Visual Basic .....123
6.3

Chapter 7 - The ZBasic IDE.....125
7.1 Using the Editor.....125
7.1.1 Basic Editing.....125
7.1.2 Special Code Editing Features .....125
7.1.3 Expand/Collapse.....126
7.1.4 Auto-Completion .....126
7.1.5 Call Tips.....126
7.2 Project Configuration, Compiling and Downloading.....127
7.3 Compiling and Downloading Individual Files.....128
7.4 Setting Serial Port Options .....128
7.5 Setting Device Options .....129
7.6 Updating Device Firmware .....129
7.7 Setting the Debug Output Limit .....129
7.8 Other Configurable Items .....129

Chapter 8 - Compiler Guide.....131
8.1 Compiler Invocation.....131
8.2 Compiler Options in Detail.....133
8.3 Error and Warning Messages .....141
8.3.1 Controlling Warnings.....141
8.3.2 Internal Errors.....142

Chapter 9 - Downloader Utility .....143
9.1 Firmware Updates .....144
9.1.1 Emergency Update Procedure .....144
9.2 Device Configuration .....145
9.3 Downloader API .....146

Appendix A - Reserved Words .....147

Appendix B - Pre-Defined Structures .....149

Appendix C - ZX-24 Series Hardware Reference.....151
C.1 External Connections .....151
C.2 Pin Configuration.....153
C.2.1 Standard Pins .....153
Detailed Pin Descriptions .....154
C.2.2 Expansion Pins.....156
Detailed Pin Descriptions .....157

Appendix D - ZX-40 Series Hardware Reference.....159
D.1 ZX-40 Series Specifications .....159
D.2ZX-40 Series Required External Components .....159
D.3
Appendix E - ZX-44 Series Hardware Reference.....165
E.1 ZX-44 Series Specifications.....165
E.2 ZX-44 Series Required External Components .....165

Appendix F - ZX-1281 Series Hardware Reference.....171
F.1 ZX-1281 Series Specifications .....171
F.2 ZX-1281 Series Required External Components .....171

Appendix G - ZX-1280 Series Hardware Reference.....175
G.1 ZX-1280 Series Specifications.....175
G.2 ZX-1280 Series Devices Required External Components .....175

Appendix H - ZX-328n and ZX-328l Hardware Reference.....179
H.1 ZX-328 Specifications.....179
H.2 ZX-328 Required External Components .....179

Appendix I - ZX-32n and ZX-32l Hardware Reference .....183
I.1 ZX-32 Specifications.....183
I.2 ZX-32 Required External Components .....183
I.3
